To,

Subject: Request for three to four months project work for MSc students

Dear Sir/Ma'am,

Greetings from the Department of Microbiology, St. Xavier's College!

As a part of the requirements of the syllabus of M. Sc. Part II Microbiology, St. Xavier's College - Autonomous, the students have to undertake a short-term research project for the completion of their course. The research project of 3-4 months (May to August 2025) is a mandatory part of the curriculum for the students and following the completion of the project, they are expected to prepare a dissertation for the same.

This is to certify that, Hiba Shaikh (UID no 2508624) is a bona-fide student of St. Xavier's College, Mumbai and is presently studying in M Sc. Part I Microbiology (academic year 2025-2026). The student will abide by the existing rules and regulations during the training at your institute / organization. I would be grateful if you could give her/him an opportunity to work in your esteemed institution for completion of the same.

Warm regards,

Dr. Aparna Shetye
Head
Department of Microbiology
