LETTER OF RECOMMENDATION

TO WHOM SO EVER IT MAY CONCERN

I have known Mr. Anishkumar Pathak for the last six months in the capacity of his professor in Microbiology at Guru Nanak Khalsa College (Autonomous), Matunga, Mumbai.

Anishkumar is currently pursuing a Master's degree in Microbiology at our institution. He is a soft-spoken, humble person with a sound knowledge of the core subject. Anishkumar is a motivated student and is willing to participate in workshops, attend seminars, and visit renowned laboratories and institutes to gain exposure to a variety of areas of interest.

Anishkumar has developed basic skills in Microbiology and is refining these skills through various workshops he attended, as can be seen from his C.V.

He is amicable with his fellow mates and can be a good team member for group projects. His internship at Equinox laboratories, have given him exposure to scientific documentation, which will be of definite use in writing scientific literature.

Anishkumar is willing to contribute to departmental work and offers help at the ground level, thus showing qualities of a true volunteer.

Anishkumar is willing to join the internship program during his study tenure. Looking at his qualities and the skillset acquired to date, I strongly recommend him as a suitable candidate for the internship program and wish him success in his future endeavours!

Sincerely,

K Purandare

Dr. Krupa Purandare,
Assistant Professor and Research Guide,
Department of Microbiology,
Guru Nanak Khalsa College of Science, Arts & Commerce (Autonomous),
Mumbai, India.
