LETTER OF RECOMMENDATION

TO WHOM SO EVER IT MAY CONCERN

I have known Mr. Shreeshail Patil for the last six months in the capacity of his professor in Microbiology at Guru Nanak Khalsa College (Autonomous), Matunga, Mumbai.

Shreeshail is currently pursuing a master's degree in microbiology at our institution. Shreeshail has a sound knowledge of the core subject.

Shreeshail has developed basic skills in Microbiology and is refining these skills through his master's studies. Shreeshail is an aspiring student willing to learn novel things and shows perseverance as can be seen from his desire to take things to completion.

He is amicable with his fellow mates and can be a good team member for group projects. Shreeshail is willing to contribute to departmental work and offers help at the ground level, thus showing qualities of a true volunteer. Shreeshail can communicate fluently in English and has good writing skills.

Shreeshail is willing to join the internship program during his study tenure. Looking at his qualities and the skillset acquired to date, I strongly recommend him as a suitable candidate for the internship program and wish him success in his future endeavours!

Sincerely,

Krupa Purandare

Dr. Krupa Purandare,
Assistant Professor and Research Guide,
Department of Microbiology,
Guru Nanak Khalsa College of Science, Arts & Commerce (Autonomous),
Mumbai, India.
