(DEEMED UNIVERSITY)*

An autonomous organization under administrative control of Ministry of Health & Family Welfare, Govt. of India
Govandi Station Road, Deonar, Mumbai 400 088.

9th March 2026

(To whomsoever it may concern)

It gives me immense pleasure to recommend the application for internship of **Ms. Anindita Chakraborty**, who is currently pursuing her Masters of Science in Biostatistics and Demography at this institute. I have known her for about a year now since her joining as a student in IIPS, and have taught her courses in Biostatistics. Through these courses and subsequent academic interactions, I have had the opportunity to assess her analytical abilities, conceptual clarity, and research orientation.

Ms. Anindita Chakraborty possesses a solid foundation in statistical methods and quantitative research techniques, including regression modelling and interpretation of demographic and health survey data. Her understanding of public health data is sound with conceptual clarity and methodological rigor. She is quite conversant with the use of large datasets and application of statistical software effectively, including R, Stata, and MS Excel, to conduct systematic and well-structured analyses. She addresses the potential research questions with curiosity, critical thinking, and careful attention to methodological detail, and is capable of independently handling complex data structures. Beyond her technical competence, she is sincere, disciplined, possesses strong communication skills and is proactive in academic discussions.

I believe that an internship opportunity at your institute will provide her with valuable exposure to advanced research in reproductive health, and I am confident that she will contribute meaningfully while benefiting from the experience. I strongly recommend her application for consideration.

Please feel free to contact me for any further information.

Sincerely,

Le. S. Mishra
