To Whom It May Concern

I am pleased to recommend Ms. Simran Naik for the Summer Internship at your esteemed institute. I have known Simran for the past three years as her faculty member in the Department of Biotechnology, where I taught her several core subjects and also supervised her final-year undergraduate research project. Throughout this period, I have had ample opportunity to assess her academic interests, laboratory skills, and scientific curiosity. In a class of 40 students, I would confidently rank her among the top three of her peer group.

Simran is an exceptionally bright and disciplined student who exhibits both intellectual curiosity and academic thoroughness. Her grasp of complex biological concepts is notably strong, and she has consistently applied logical reasoning and analytical thinking to problem-solving in both theoretical and practical contexts. She is not content with surface-level understanding but explores broader dimensions of a subject, often integrating insights from current research literature to enrich her learning. Her well-developed communication skills, both written and verbal, allow her to present ideas clearly, whether in class discussions or presentations.

During her final-year research project under my supervision, Simran demonstrated outstanding aptitude for research. She meticulously planned and executed experiments, recorded observations with precision, and critically evaluated her findings. Her ability to connect theoretical principles with laboratory practice was evident throughout her work. These attributes, combined with her enthusiasm for discovery and commitment to scientific integrity, reflect her potential as a promising young researcher. Simran also demonstrates maturity, open-mindedness, and adaptability - qualities essential for thriving in an international academic environment. She interacts respectfully and effectively with peers, values teamwork, and readily contributes in collaborative settings.

In summary, Ms. Simran Naik is an intelligent, motivated, and dependable student with strong research instincts and excellent interpersonal skills. I am confident that she will contribute meaningfully to the Summer Internship Program and grow further through the experience. I wholeheartedly recommend her for selection and wish her every success in her academic and professional pursuits.

Yours sincerely,

Amrita Sherlekar
