To Whom It May Concern

I am writing to strongly recommend Arshiya shajan and attest to her qualification. Arshiya shajan attended MSc Reproductive and Developmental biology for two years. I have known Arshiya as the Former Professor and Head of Department of Reproductive sciences at Kasturba Medical College, Manipal, during the course of her postgraduate studies. In this capacity, I have had the opportunity to observe her academic growth, professional attitude, and research abilities closely.

Academically, Arshiya has shown consistent performance and a genuine interest in understanding core concepts. She approaches her studies with discipline and is quick to grasp both theoretical and applied aspects of the curriculum.

In the laboratory, she has demonstrated competence in various techniques including cell culture, animal handling, toxicology assays, and general molecular biology methods taught during the course. She is careful, methodical, and understands the importance of precision in experimental work. She is also mindful of lab protocols and maintains good documentation practices.

One of her standout qualities is her exceptional presentation skills. Whether it's an academic seminar, journal or thesis presentation she delivers content with clarity, confidence, and structure. Her ability to explain complex ideas in an accessible and engaging manner makes her a natural communicator. She also took on the role of class representative, effectively managing responsibilities and communication between students and faculty. She carried out this role with maturity and reliability.

A testament to her leadership was her successful organization of a Science Day event, during which she led the event with creativity, initiative, and exceptional coordination, bringing together faculty, students, and external participants.

In all her endeavors, Arshiya Shajan has shown admirable dedication, responsibility, and professionalism. I am confident that she will bring the same enthusiasm and excellence to any future academic or research opportunity.

Sincerely,

Dr Guruprasad Kalthur
Dean of Research and Innovation
Head, Sree Mookambika Centre for Research and Innovation
Sree Mookambika Institutes
Padanilam, Kulasekharam-629161.
Tamil Nadu, India

Prof. Guruprasad Kalthur, M.Sc., Ph.D.
Dean
Dept of Research and Innovation
Sree Mookambika Institutions
Kulasekharam, Kanyakumari, Tamil Nadu
